

Practicum Journal

Prelim Journal

Student: Alice Brown

Course: BSIT 402401

Host Company: Tech Solutions Inc.

Period: April 01 - April 30, 2026

Objectives

During this period, I focused on learning the company's tech stack including React, Node.js, and PostgreSQL. My goal was to understand the codebase and start contributing to minor features.

Activities & Tasks

I received

training on database management and worked on optimizing SQL queries. I also shadowed the senior frontend developer for two days to understand their component architecture.

Challenges Faced

The main challenge I faced was adapting to the agile workflow and understanding the complex state management patterns used in the main application.
